Budget Process Timeline

Message from the Budget Director

Honorable Judge and Commissioners:

I am pleased to present the proposed budget for Harris County, encompassing both the General Fund, the Harris County Toll Road Authority (HCTRA), and the Flood Control District.

In this budget, we strove to responsibly restore funding that was lost through the default to the No New Revenue (NNR) tax rate in the prior fiscal year, while funding in Commissioners Court's decisions-to-date, and priorities, while continuing to lower the tax rate for the sixth year in a row. The budget includes the highest cost of living adjustment (COLA) for civilian employees in the last 5 years, 3 additional district criminal courts to further reduce the County's court backlog, and strategic increases to public health and safety.

I greatly appreciate your consideration of the proposed budget.

Daniel Ramos
Executive Director
Harris County Office of Management and Budget

HOW TO READ VOLUME II - DEPARTMENT DETAIL

The Harris County Volume II - Department Detail is an exploration of the department and program-level operating budgets for all departments. It provides a structural overview of the department by programs and services, a breakdown of the department's historical and proposed operating budget at the department-level and the program-level, a display of the department's performance measures and impacts to performance, and the department's proposed position list. Operating budgets shown in this detail include the General Fund (Fund 1000), Flood Control's Operating Fund (2890), the Toll Road Operating & Maintenance fund (5302), and the Tunnel & Ferry Operating & Maintenance fund (5310).

Not every section will be present for each department's detail, as certain departments may not have a program/service structure, performance measures, or have gained any new positions through this fiscal year's budget process.

Department Overview

Every section begins with a department-level summary of the organization's:

i. Mission and Structure

Children's Assessment Center

MISSION

The mission of The Children's Assessment Center is to provide a professional, compassionate and coordinated approach to the treatment of sexually abused children and their families and to serve as an advocate for all children in our community.

Positions Overview

This section lists baseline position estimates and positions funded or accepted as offsets through the FY24 budget process. Newly funded positions include those funded through CLS and Service Enhancements, while positions identified and accepted during the 98% CLS Budget process are included as position offsets. These position lists are broken out by position classification.

Baseline position estimates were derived from a holistic review of departments adjusted labor budget compared against the cost of filled positions as of March 2023. In some cases, remaining labor budget was allocated to unfilled positions. The table should not be used to determine available and budgeted positions. Departments should contact OMB to understand the positions available to fill and determine what they can afford based on their current labor budget. Contract patrol positions added after SFY22 are added to the adjusted budget, but are not counted towards adopted budget.

Fosters information sharing, coordinates disease detection and control efforts, provides staff training for internal and external partners, and initiates joint community education activities.
	Mosquito Surveillance & Virology	Monitors the environment and defines the nature and extent of disease vectors on a county wide basis. Assesses the potential for vector-borne disease transmission, determining species of public health significance, generating data needed for justification of treatment, and evaluating the effectiveness of control measures. Arboviral disease surveillance and population monitoring are accomplished through the collection and identification of mosquitoes, birds, and ticks and submitting samples to virology for testing. HCPH's integrated vector management (IVM) approach has propelled the agency to be a leader emerging infectious disease (EID) and vector borne diseases. Enhanced vector surveillance allows Harris County to better detect risk for outbreaks before they occur. Investment into technology and infrastructure to enhance granularity of surveillance will ensure data driven policies and resilient resource allocations.
	Mosquito Treatment and Control	Performs ground and aerial adulticiding (spraying) of areas with confirmed mosquito-borne disease or a declared disaster, and preventive treatments to limit activity of vectors. Improves health where we live, learn, work, worship, and play by decreasing the risk of preventable mosquito-borne diseases. Prevents diseases before they are transmitted, an upstream strategy that helps HCPH mitigate the transmission of vector-borne diseases in the community.
